Jeremy,

Mr. Barrett let me know that you were requesting an update on the Kisatchie Aeration project Permit #23-06-079-104. The construction project is completed, but we have an ancillary project on the site to replace the weir boxes on the ground storage tank. The City was waiting for that work to be completed and normal operations to resume before "commissioning" the new aeration. The Contractor is scheduled to complete the work by March 14th, so we should be fully on line around that time.

I've gone ahead and completed the construction certificate and attached it for everyone's records.

Thanks, and please let me know if you have any questions or need any additional information.
